KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a sub-fund of an umbrella unit trust constituted in Singapore. The Sub-Fund aims to generate long-term capital appreciation for investors by investing all or substantially all of its assets in Fullerton Lux Funds – Asian Bonds ("**LABF**"). LABF is a sub-fund of Fullerton Lux Funds, a SICAV.
- Distributions (if any) may be declared in our absolute discretion and may reduce the Sub-Fund's NAV. Distributions may be made out of capital.

Refer to the "Basic Information" section and Annex 3 (A and G) of the Prospectus for further information on features of the product.

Investment Strategy

- LABF invests in fixed income or debt securities denominated primarily in US\$ and Asian currencies, issued by companies, governments, quasi-governments, government agencies or supranationals in the Asian region.
- LABF invests using a combination of top-down macro research for duration or interest rate management and sector allocation, and bottom-up analysis for credit selection and yield curve positioning.
- We may use FDIs for hedging and EPM purposes (namely, managing risks). LABF may employ FDIs as part of its investment strategy or for EPM or hedging purposes.
