KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a sub-fund of an umbrella unit trust constituted in Singapore. The Sub-Fund aims to provide you with returns through long-term capital appreciation by investing primarily in fixed income or debt securities denominated in SGD.
- Distributions (if any) may be declared in our absolute discretion and may reduce the Sub-Fund's NAV.

Refer to the "Basic Information" section and Annex 4 (A and D) of the Prospectus for further information on features of the product.

Investment Strategy

- The Sub-Fund will invest primarily in fixed income or debt securities denominated in SGD. These securities will primarily be issued by the Singapore government, government agencies, quasi-government institutions, statutory boards and corporations.
- We seek to add value from the following sources: interest rate accruals, selection of bonds and/or credits and duration management (optimisation of bond returns by selecting bonds with different terms to maturity).
- The Sub-Fund will primarily invest in investment grade issues. However, non-rated SGD issues are permitted if they meet our internal equivalent rating of investment grade.
- The Sub-Fund may also invest in other Authorised Investments, including securities issued by non-Singapore entities.
- We may use FDIs for hedging and EPM purposes (namely, managing risks) without leveraging the portfolio.

Refer to Annex 4 (B) of the Prospectus for further information on the investment strategy of the product.
