Fullerton Lux Funds - Asia Equities Class A (USD) Acc

September 2026

Investment Objective

The investment objective of the Fund is to achieve competitive risk adjusted returns on a relative basis.

Investment Focus and Approach

The Fund invests primarily in, but not limited to, equities, index futures, cash and cash equivalents. Generally, the Fund's bottom up stock selection method aims to generate return throughout market cycles.

The investment universe will include, but is not limited to, equities and equities-related securities listed on exchanges in the Asia region, as well as equities and equities-related securities of companies which have operations in, exposure to, or derive part of their revenue from the Asia region, wherever they may be listed. The Fund may also make indirect investments in equities via P-notes and other eligible access products (where the underlying assets would comprise equities defined above).

The Fund's investment in China "A" Shares listed on PRC Stock Exchanges may be made through the Stock Connects and/or any other means as may be permitted by the relevant regulations from time to time, for up to 35% of the Fund's Net Asset Value. The Fund may invest in money market instruments, money market funds, term deposits, bank deposits and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions. The Fund may hold up to 20% of its Net Asset Value in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts).

SFDR Classification:

Article 8 fund.

In line with its ESG methodology, the fund promotes environmental characteristics but does not commit to make environmentally sustainable investments as defined in the taxonomy regulation.

Performance (%)

	1 mth	3 mths	6 mths	1 yr	Sl. Ann. Ret.	Sl. Ann. Vol.
Fund (bid-to-bid)	1.22	-2.57	28.61	34.69	40.31	29.45
Fund (offer-to-bid)	-3.60	-7.21	22.48	28.28	34.94	NA
Benchmark	-0.30	-0.36	27.25	31.14	34.74	NA

Returns of more than 1 year are annualised. Returns are calculated on a single pricing basis in USD with net dividends and distributions (if any) reinvested. Offer-to-bid returns include an assumed preliminary charge of 5% which may or may not be charged to investors. Past performance is not indicative of future returns.

Market Review

MSCI Asia ex-Japan fell 0.3% in USD terms in September, marginally outperforming MSCI ACWI. Information Technology led the market, while Consumer Discretionary, Financials, and Communication Services lagged. Taiwan and Korea both rose, supported by the technology sector.

MSCI China fell 4.6% in USD terms in September. China's manufacturing PMI returned to expansion at 50.1 in September, from 49.8 in August, while the non-manufacturing PMI rose to 50.2 from 49.0. CPI rose 0.8% YoY in August, from 0.5% in July, while core CPI rose 1.0% YoY from 0.9% in July. PPI increased 3.8% YoY in August, up from 3.5% in July.

MSCI India fell 6.9% in USD terms in September. India's manufacturing PMI rose to 55.1 in September, from 52.8 in August, its strongest reading in seven months. Industrial production grew 8.0% YoY in August, up from 7.4% YoY in July, while CPI inflation rose to 4.82% YoY in August, up from 4.45% in July.

MSCI Taiwan rose 4.2% in USD terms in September. August industrial production rose 23.5% YoY, down from 25.6% in July, supported by AI-driven manufacturing demand. Taiwan CPI rose to 2.7% YoY in September, from 2.0% in August, reaching its largest increase since February 2024. Consumer confidence rose to 68.8 in September, up from 65.0 in August.

MSCI Korea rose 3.2% in USD terms in September, as the technology sector recovered. Korea's exports grew 83.5% year on year in September, driven by semiconductor exports. South Korea CPI rose by 2.9% in September, down from 3.1% YoY in August. Manufacturing activities continue to expand, with PMI of 53.9 in September, up from 52.3 in August.

Investment Strategy

We are positive on Asia ex-Japan equities on a 12-month basis. We remain confident that Asian economies will deliver stronger earnings growth, supported by exports.

We have identified several key investment themes, including AI diffusion, disruption, and policy beneficiaries. Leading companies are benefiting from stronger demand along the technology supply chain, while policy beneficiaries remain an important growth driver in Asia.

China has adopted a more proactive, government-led policy stance. This includes investment in infrastructure, power grids, computing capacity, education, and healthcare. Domestic policies continue to drive technological self-reliance, strengthen national security, upgrade industrial production and support the consumer sector. We expect to see growth opportunities from China's "new economy" sectors.

Taiwan and Korea continue to lead in the manufacturing of AI-related equipment and solutions. Strong demand for memory and semiconductor components has supported earnings growth. We believe well-positioned companies in Taiwan and Korea are likely to benefit from sustained AI-related supply-chain demand for advanced semiconductor foundry, high-bandwidth memory and packaging.

India's economy has been affected by higher energy costs. While foreign portfolio outflows remain a headwind, domestic liquidity and a broadly supportive reform and policy backdrop remain intact. Companies will need to deliver growth amid higher energy costs. We are positive on selected opportunities in financials and healthcare.

We expect Asian economic growth to remain resilient. Investors are skeptical about the sustainability of growth, causing equity returns lagging behind earnings growth. MSCI Asia ex-Japan valuations, on a forward P/E basis, remains below their long-term average.
