

Fullerton Lux Funds - Asian Bonds - Class A (USD) Acc

October 2025

Investment Objective

The investment objective of the Fund is to generate long term capital appreciation for investors.

Investment Focus and Approach

The Investment Manager seeks to achieve the objective of the Fund by investing in fixed income or debt securities denominated primarily in USD and Asian currencies, issued by companies, governments, quasi-governments, government agencies or supranationals in the Asian region.

The Asian countries include but are not limited to China (including Hong Kong SAR and Taiwan), South Korea, India, Thailand, Malaysia, Singapore, Indonesia, the Philippines, Pakistan and Vietnam.

SFDR Classification:

Article 8 fund.

In line with its ESG methodology, the fund promotes environmental characteristics but does not commit to make environmentally sustainable investments as defined in the taxonomy regulation.

Performance (%)

	1 mth	3 mths	6 mths	1 yr	3 yrs	5 yrs	10 yrs	Sl. Ann. Ret.	Sl. Ann. Vol.
Fund (bid-to-bid)	0.65	3.08	5.66	5.87	7.13	0.46	2.57	2.72	4.73
Fund (offer-to-bid)	-4.14	-1.83	0.63	0.83	5.41	-0.52	2.07	2.34	NA
Benchmark	0.66	2.79	4.68	6.92	7.93	1.80	3.48	3.36	4.17

Returns of more than 1 year are annualised. Returns are calculated on a single pricing basis in USD with net dividends and distributions (if any) reinvested. Offer-to-bid returns include an assumed preliminary charge of 5% which may or may not be charged to investors. Past performance is not indicative of future returns.

Benchmark: JACI Investment Grade Total Return Index.

Market Review

Asian credit markets advanced in October, as reflected by the J.P. Morgan Asian Credit Index. Both investment-grade and high-yield segments posted gains, supported by duration effects and spread tightening, with high yield outperforming investment grade on greater spread compression.

In the U.S., the Federal Reserve (Fed) delivered a widely expected 25bp rate cut, lowering the Fed Funds target range to 3.75–4.00%. However, Chair Powell's hawkish tone signalled that further cuts were "not a foregone conclusion." U.S. Treasury yields initially declined on concerns over a prolonged government shutdown and renewed trade tensions before rebounding later in the month as the Fed's guidance tempered expectations of additional near-term easing. The 10-year Treasury yield traded within a 3.9–4.2% range, ending at 4.1%, about 7bps lower than September's close.

In the realms of the Asian credit markets, Sri Lanka, Pakistan, and Indonesia led regional performance, supported by tighter credit spreads and positive duration effects. In contrast, China, Korea, and Singapore underperformed, weighed down by more limited spread compression. From a sector perspective, Real Estate, Transport, and Metals & Mining were the top-performing segments, driven primarily by spread tightening. Conversely, Infrastructure, Financials, and Industrials which are sectors dominated by investment-grade issuers lagged amid more muted spread movements.

Investment Strategy

The global backdrop is characterised by a de-escalation in US–China tensions, a Federal Reserve (Fed) that has resumed easing while keeping the path forward data-dependent. Private indicators continue to point to a softening of the US labour market alongside a still-resilient US economy, supporting a base case of a brief deceleration before re-acceleration into 2026.

Over in China, the country's industrial output and exports remain firm, while domestic demand stays subdued. Policy support including the accelerated deployment of the RMB 500 bn policy bank tool should lift activity into year-end. The Fourth Plenum reaffirmed China's focus on structural transformation and self-sufficiency, highlighting high-quality growth, technology independence, advanced manufacturing, and domestic-demand expansion.

In terms of investment strategies and as we approach year-end, our focus shifts toward preserving performance and managing risk, given the potential for supply-related volatility. The recent surge in large U.S. credit issuance, particularly AI-related deals, has raised the risk of spillover effects into Asian credit markets. With Asia credit supply expected to taper heading into year-end and investors likely to take profits and stay on the sidelines, we expect demand to soften in the near term, warranting a more risk-off positioning.

Throughout 2025, security selection has been the key driver of performance, a trend we expect to persist as dispersion within credits remains elevated. Our focus continues to be on idiosyncratic credit opportunities rather than broad sector exposure. We have maintained an overweight in duration, particularly in the belly of the curve, which offers attractive relative carry given low front-end yields and the risk of long-end steepening. In high yield, we are locking in gains on credits that have performed strongly and rotating into laggards where valuations remain compelling. Overall, portfolio positioning remains disciplined and selective, with an emphasis on maintaining resilience amid tighter spreads and a seasonally lighter year-end liquidity environment.
