Market Review

Global equity markets rose in February, with MSCI All Country World Index up 1.3%. Best performing region was South Korea (+22.0%), Thailand (+20.6%), and Taiwan (+12.8%), while Denmark (-18.6%), Hong Kong (-6.0%), and Saudi Arabia (-5.6%) were bottom performers. From a sector perspective, best performing sectors were Materials (+9.8%), Utilities (+8.7%), and Consumer Staples (+8.4%), while worst performing sectors were Communications (-5.3%), Consumer Discretionary (-2.9%), and Technology (-1.1%).

In the US, the Federal Reserve held interest rates steady, pausing its easing cycle. Labour market showed contraction in February, with 92,000 jobs lost and unemployment rate rising to 4.4%. Fears of a "private credit reckoning" intensified, underscored by Fitch Ratings reporting that the US private credit default rate hit 5.8% by the end of January, its highest since tracking began. Lenders like Blue Owl Capital began halting investor withdrawals to manage liquidity.

The Eurozone economy sustained a steady expansion in February, with the Composite PMI rising to 51.9 from 51.3 in January. Manufacturing PMI hit a 44-month high of 50.8 in February, while the Services PMI reached 51.9, up from 51.6. The ECB maintained its 2026 inflation forecast at 1.9%, even as February's flash headline inflation ticked up slightly to meet that target. In France, the protracted political standoff concluded on February 2 after the 2026 state budget was definitively adopted. The European economy could be meaningfully impacted by the ongoing Iran-Israel-US conflict, which escalated in late February.

Investment Strategy

We are positive on global equities. We have identified key investment themes such as frontier technology, including artificial intelligence (AI) and physical AI, domestic manufacturing, and policy shift winners. We expect leading companies in these respective themes to provide investment opportunities. We continue to see bottlenecks along the AI supply chain, while a wider range of applications are being developed and deployed. In the US, while the ongoing conflict with Iran may drive higher energy prices and inflation concerns, we believe business confidence is improving, and capital investments into the industrial and manufacturing sectors should bode well for leading companies with strong market positions. European economy will benefit from fiscal stimulus in 2026. We are positive on China's investment in the technology and AI sector as it strives to be technology self-sufficient, especially with significant investments by China's key technology companies.
