Fullerton SGD Income Fund - Class B

June 2025

Investment Objective

The investment objective of the Fund is to generate long term capital appreciation and/or income for investors in SGD terms by investing primarily in fixed income or debt securities.

Investment Focus and Approach

The Managers seek to add value from interest rate accruals, selection of bonds and/or credits and duration management (optimisation of bond returns by selecting bonds with different terms to maturity). The Fund will invest in a diversified portfolio of primarily investment grade fixed income or debt securities having a minimum long term credit rating of BBB- by Fitch, Baa3 by Moody's or BBB- by Standard & Poor's (or their respective equivalents) and cash.

The Fund may also invest in non-investment grade bonds (i.e. bonds with a long term credit rating of less than BBB- by Standard & Poor's, Baa3 by Moody's or BBB- by Fitch (or their respective equivalents)) of up to 30% of its Net Asset Value.

The Fund may invest in Singapore Dollar and foreign currency denominated bonds including but not limited to US Dollar, Euro, Japanese Yen and Australian Dollar. The foreign currency denominated bonds will be fully hedged back to the Singapore Dollar except for a 5% frictional currency limit.

Performance (%)

	1 mth	3 mths	6 mths	1 yr	3 yrs	5 yrs	10 yrs	SI. Ann. Ret.	SI. Ann. Vol.
Fund (bid-to-bid)	1.19	1.46	3.01	5.98	2.98	0.03	1.84	2.59	3.91
Fund (offer-to-bid)	-1.76	-1.50	0.01	2.89	1.97	-0.56	1.54	2.36	NA

Returns of more than 1 year are annualised. Returns are calculated on a single pricing basis in SGD with net dividends and distributions (if any) reinvested. Offer-to-bid returns include an assumed preliminary charge of 3% which may or may not be charged to investors.

Credit Rating : Where the security is not rated by external rating agencies, Fullerton's internal rating methodology will apply.
Yield to Worst (YTW): Refers to YTW in base currency taking into account the hedging cost. Not guaranteed. Past performance is not necessarily indicative of future performance.

Market Review

Singapore released a series of macroeconomic indicators in June that provided a snapshot of current domestic conditions. Headline inflation remained subdued, with May CPI rising just 0.8% year-on-year, underscoring the absence of significant price pressures despite external uncertainties. Meanwhile, industrial production declined on a seasonally adjusted monthly basis, although year-on-year growth stayed in positive territory.

Against this backdrop, Singapore Government Securities (SGS) yields declined meaningfully across the curve, mirroring global bond market movements. The 2-year SGS yield fell by 22 basis points, while the 10-year yield declined by 24 basis points—outperforming both U.S. Treasuries and the non-SGS market, as reflected by the Markit iBoxx ALBI Singapore indices.

In the U.S., Treasury yields also declined across the curve, as dovish shifts in rate expectations drove yields. The 10-year Treasury yield fell by 17 basis points, while the 2-year yield declined 18 basis points, reflecting growing market confidence in an earlier start to the Fed's easing cycle. This was driven by softer-than-expected inflation prints and weaker ISM services data. Speculation also intensified that President Trump might appoint a more dovish Fed chair, contributing to lower front-end yields. Although geopolitical tensions in the Middle East triggered brief intra-month volatility—pushing oil prices and yields higher temporarily—these moves quickly reversed as risk sentiment remained resilient overall.

Asian credit markets responded positively to the supportive rate environment. The JP Morgan Asian Credit Index posted gains for the month, driven largely by duration-related returns as US Treasury yields declined. Investment-grade (IG) credits outperformed high yield (HY), benefiting more significantly from falling US Treasury yields. HY bonds also generated positive returns, albeit to a lesser extent, as credit spreads narrowed modestly across both segments.

Investment Strategy

Looking ahead, we see the global economy leaning toward a mild stagflationary environment, marked by softening global growth and persistent core inflation—largely driven by renewed price pressures in the U.S. Our base case assumes fading U.S. exceptionalism, with downside risks from potential negative shocks such as a further escalation in U.S. tariffs and weakening global business sentiment. That said, a full-blown U.S. recession remains unlikely. Outside the U.S., inflation pressures are expected to remain contained, and with the U.S. dollar weakening amid fading growth differentials, the backdrop remains supportive of monetary policy easing across Asia.

In Singapore, external headwinds continue to weigh on its export-oriented economy. GDP growth forecasts for 2025 have been revised lower to a range of 0.0–2.0%, and real economic activity has shown signs of moderation. Inflation remains subdued, reinforcing expectations that the Monetary Authority of Singapore (MAS) will maintain its easing bias. A further reduction in the slope of the S$NEER policy band is likely, potentially as early as the July policy meeting or by October. With the MAS continuing FX operations and maintaining flush liquidity conditions, SGS yields are expected to stay rangebound or potentially drift lower—particularly at the front end. Demand for SGS and SGD government bills remains firm, underpinned by strong domestic liquidity and a stable technical backdrop.

In terms of investment strategies, we continue to maintain our current duration positioning, which is near the upper end of the Fund's 5-year limit, as recent rallies in both U.S. Treasuries and Singapore Government Securities (SGS) have added positively to overall performance. Within credit, we maintain a preference for SGD-denominated bonds over USD exposure, supported by ample SGD liquidity and elevated USD/SGD hedging costs that currently diminish the relative appeal of USD credit. Our high yield allocation remains stable at around 20%, with a focus on short-dated credits offering attractive carry, low refinancing risk, and resilient business profiles—critical features amid ongoing macro headwinds and trade uncertainties.
