Fullerton USD Income Fund - Class G (USD)

November 2025

Investment Objective

The investment objective of the Fund is to generate long term capital appreciation and/or income for investors by investing primarily in fixed income or debt securities.

Investment Focus and Approach

The Fund will invest in a diversified portfolio of primarily investment grade fixed income securities having a minimum long-term credit rating of BBB- by Fitch, Baa3 by Moody's or BBB- by Standard & Poor's (or their respective equivalents) and cash. The Fund may also invest in non-investment grade bonds of up to 30% of its Net Asset Value. Non-rated bonds are permitted if they meet the Managers' internal equivalent rating of investment grade. The Fund aims to invest at least 50% of its Net Asset Value in USD denominated bonds. The Fund will be broadly diversified with no specific geographical or sectoral emphasis.

The Managers may use Financial Derivative Instruments (FDIs) for hedging and efficient portfolio management purposes.

Performance (%)

	1 mth	3 mths	6 mths	1 yr	3 yrs	5 yrs	SI. Ann. Ret.	SI. Ann. Vol.
Fund (bid-to-bid)	-1.01	1.53	7.12	8.91	7.17	0.46	1.99	5.53
Fund (offer-to-bid)	-3.89	-1.42	4.00	5.74	6.11	-0.13	1.61	NA

Returns of more than 1 year are annualised. Returns are calculated on a single pricing basis in USD with net dividends and distributions (if any) reinvested. Offer-to-bid returns include an assumed preliminary charge of 3% which may or may not be charged to investors.

Market Review

Asian USD credit delivered modest gains over the month, according to the JP Morgan Asian Credit Index, supported primarily by duration-driven returns as U.S. Treasury yields drifted lower. Market sentiment in the U.S. evolved through the month, with early hawkish signals from Fed officials giving way to expectations of a potential December rate cut. The 10-year US Treasury traded within a tight range before ending the month slightly below October's close, helped by a late-month shift toward more dovish Fed commentary. This decline in yields provided a meaningful tailwind for Asian credit, offsetting the impact of broader spread widening. Investment-grade names held up relatively well, generating small positive returns given their lower spread volatility, while the high-yield segment declined as more pronounced spread widening and softer risk appetite weighed on performance.

Across sectors, real estate was the clear laggard, hurt by renewed concerns surrounding select China property developers. Other high-yield-heavy segments, including consumer, also posted losses. In contrast, longer-duration sectors such as oil and gas and industrials benefited from the move in underlying rates and led performance. At the country level, higher-quality markets like Hong Kong and Korea outperformed, while EM-Asia sovereigns, including Sri Lanka and the Philippines, underperformed over the month.

Investment Strategy

The global backdrop entering the year-end remains characterised by a gradual cooling in U.S. labour-market conditions alongside steady, if uneven, economic activity. Inflation has moderated but remains sticky enough to keep the Federal Reserve (Fed) cautious. Against this backdrop, the Fed is likely to maintain a data-dependent stance, with scope to deliver additional "insurance cuts" to cushion labour-market softness while preserving flexibility should inflation surprise on the upside.

From a portfolio perspective, following a year of strong performance, we have adopted a more cautious stance approaching year-end, mindful of the risks of profit-taking and de-risking. This is reinforced by the potential for supply indigestion from heavy U.S. credit issuance, leading us to avoid stretching risk at this stage. Accordingly, we have shifted portfolio positioning toward higher-quality investment-grade credits while trimming exposure to the high-yield segment. We also maintain an underweight to the ultra-long end of the yield curve, as a widening fiscal deficit could push term premia higher and result in a steeper U.S. yield curve.

Looking ahead, scope for further Fed rate cuts, still-attractive all-in yields, and reduced U.S. tariff uncertainty should continue to support credit market technicals into 2026. With credit dispersion remaining elevated and performance in 2025 largely driven by security selection, we expect idiosyncratic credit selection to remain a key source of alpha in the year ahead.
