## Prepared on: 29 December 2023

This Product Highlights Sheet is an important document.

- It highlights the key terms and risks of this investment product and complements the Singapore Prospectus<sup>1</sup>.
- It is important to read the Singapore Prospectus before deciding whether to purchase units in the product. If you do not have a copy, please contact us to ask for one.
- You should not invest in the product if you do not understand it or are not comfortable with the accompanying risks.
- If you wish to purchase the product, you will need to make an application in the manner set out in the Singapore Prospectus.

## **FULLERTON LUX FUNDS – ASIAN SHORT DURATION BONDS**

(the "Fund")

<sup>1</sup> The Singapore Prospectus is available from the Singapore Representative or authorised distributors. It is also available at http://www.fullertonfund.com.

<sup>2</sup> This refers to the earliest launched Share Class that is offered under the Singapore Prospectus.

<sup>3</sup> The "Manager" and "Custodian" in this table refers to the Management Company and the Depositary Bank respectively, as used in the Product Highlights Sheet and the Singapore Prospectus.

<sup>4</sup> Figures relate to Share Classes offered in Singapore that have been incepted as at the stated date. Please refer to the Singapore Prospectus for the specific expense ratio of each Share Class.

Parties Involved		
<ul> <li>WHO ARE YOU INVESTING WITH?</li> <li>The Management Company is Lemanik Asset Management S.A.</li> <li>The Investment Manager and Singapore Representative is Fullerton Fund Management Company Ltd.</li> <li>The Depositary Bank is BNP Paribas, Luxembourg Branch.</li> </ul>	Refer to paragraph 2 of the Singapore Prospectus for further information on their roles and responsibilities, and what happens if they become insolvent.	
KEY RISKS		
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the product and its distributions may rise or fall. These risk factors may cause you to lose some or all of your investment (including initial principal investment). You should note that the NAV of the Fund has potential for high volatility due to its investment policies or portfolio management techniques.	Refer to paragraph 5 of the Singapore Prospectus for further information on risks of the product.	
<ul> <li>You are exposed to the risk of investing in emerging and less developed markets. The legal, judicial and regulatory infrastructure of such markets is still developing and there is much legal uncertainty.</li> <li>You are exposed to political, regulatory and economic risks. Economic and/or political instability could lead to legal, fiscal and regulatory changes. Taxes or exchange controls can be imposed suddenly. Assets could be compulsorily re-acquired without adequate compensation. Inflation and deflation may result in a decline in the value of the Fund's portfolio. Tax law and practice in certain countries is not clearly established. Additional taxation that is not anticipated when investments are made, valued or disposed of may be imposed.</li> <li>You are exposed to market custody and settlement risks. Securities markets in some countries lack the liquidity, efficiency and regulatory controls of more developed markets. Provisions for custody and legal/beneficial interests and settlement procedures may be less developed than more mature markets. Depositary Bank and subsuctodians may default. The Fund may be affected by inability to repatriate income, capital or sale proceeds.</li> <li>You are exposed to credit risks. The issuer of securities and counterparties to transactions may default on their obligations. Credit ratings of an investment are largely based on historical information and may not reflect current financial, volatility or liquidity conditions. Lower rated, higher yielding debt securities are subject to greater market and credit risks than higher rated securities.</li> <li>You are exposed to exchange rate risks. The Fund's investments may be denominated in different currencies and affected by exchange rate fixs. The level of bolas and other debt instruments usually rise and fall in response to changes in interest rates.</li> <li>You are exposed to currency control risks. Certain Asian currencies are not freely convertible and are subject to foreign exchange control policies and regulati</li></ul>		
Liquidity Risks		
<ul> <li>The Fund is not listed and you can redeem only on Dealing Days via the Singapore Representative or approved distributors.</li> </ul>
