 - are comfortable with the risks of a fund which invests in a diversified portfolio of primarily government bills, cash, money market instruments and investment grade fixed income securities having a minimum long term credit rating of BBB by Fitch, Baa2 by Moody's or BBB by Standard & Poor's (or their respective equivalents).

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a sub-fund of an umbrella unit trust constituted in Singapore. The Sub-Fund seeks to balance between liquidity and yield, targeting a higher return than SGD fixed deposit rate.
- Distributions (if any) may be declared in our absolute discretion and may reduce the Sub-Fund's NAV. Distributions may be made out of capital. For Classes A2 and C2 (US\$-Hedged), we intend to declare quarterly distributions. All other classes are accumulating classes.

Refer to the "Basic information" section and Annex 14 (A and G) of the Prospectus for further information on features of the product.

Investment Strategy

- The Sub-Fund will invest in a diversified portfolio of primarily government bills, cash, money market instruments, and investment grade fixed income securities having a minimum long term credit rating of BBB by Fitch, Baa2 by Moody's or BBB by Standard & Poor's (or their respective equivalents).
- Non-rated bonds will be subject to our internal rating process and will follow our internal equivalent rating.
- For the avoidance of doubt, the minimum long term credit rating for fixed income securities is applicable at the point of purchase only.
- The Sub-Fund may invest in Singapore Dollar and foreign currency denominated bonds. The foreign currency denominated bonds will be hedged back to the Singapore Dollar except for a 5% frictional currency limit (to account for possible deviations from a 100% hedge).

Refer to Annex 14 (B) of the Prospectus for further information on the investment strategy of the product.
